Weixian Shi

Phone: +49 15257477188   Email: **weixian_shi@outlook.com**

Education

2019-2022   **MSc, Computer Science**; Bonn University; Germany (English)

A paper accepted by ICRA 2022

2007-2010   **BSc, Software Engineering**; Shandong University; China (Bilingual)

One 1st prize in national software competition and two first prizes in provincial competitions

Research Experience

Master Thesis:

Short text containing the type of work done, results obtained, lessons learned and other remarks. Can also include lists and links:

- First item
- Item with **link**. Links will work both in the html and pdf versions.

Student Research Assistant (ICRA2022)

Act as a student research assistant in Humanoid Robots Lab at Bonn University, focus on human-aware robot navigation with deep reinforcement learning, and result in an **ICRA2022** paper

Publications

Enhanced Spatial Attention Graph for Motion Planning in Crowded, Partially Observable Environments

Technical Experience

My Cool Side Project   For items which don't have a clear time ordering, a definition list can be used to have named items.

- These items can also contain lists, but you need to mind the indentation levels in the markdown source.
- Second item.

Open Source   List open source contributions here, perhaps placing emphasis on the project names, for example the **Linux Kernel**, where you implemented multithreading over a long weekend, or **node.js** (with **link**) which was actually totally your idea…

Programming Languages   **first-lang:** Here, we have an itemization, where we only want to add descriptions to the first few items, but still want to mention some others together at the end. A

format that works well here is a description list where the first few items have their first word emphasized, and the last item contains the final few emphasized terms. Notice the reasonably nice page break in the pdf version, which wouldn't happen if we generated the pdf via html.

second-lang: Description of your experience with second-lang, perhaps again including a [link] **ref**, this time placing the url reference elsewhere in the document to reduce clutter (see source file).

obscure-but-impressive-lang: We both know this one's pushing it.

Basic knowledge of **C**, **x86 assembly**, **forth**, **Common Lisp**

Extra Section, Call it Whatever You Want

- Human Languages:
  - English (native speaker)
  - ???
  - This is what a nested list looks like.
- Random tidbit
- Other sort of impressive-sounding thing you did
